Nature at your feet

Excellence in flooring

Amorim Revestimentos, the worldwide market leader of cork flooring, places nature on the starting point for a better future, investigating and creating flooring solutions that, without affecting the environment, ensure a higher quality of life.

Being present in more than 51 countries, Amorim Revestimentos' International flooring portfolio and brands, are known throughout the world as pioneers in creating top-quality, ground-breaking solutions.

Wicanders®, Amorim Revestimentos' premium brand, has been producing flooring since 1868, always inspired on nature's most pure values and using avant-garde technologies to provide high quality, ecologic and stylish flooring.

Wicanders® has an unsurpassed reputation for providing high standard and unique comfortable flooring solutions, following the latest decoration tendencies and targeting both residential and commercial market segments.

Cork - A truly nature's miracle!

Cork comes from the bark of the cork oak tree. It is removed from the trunk by hand without ever damaging the tree. Every year a new bark grows making it a renewable and sustainable resource. Cork is ideal in terms of the ever increasing demand for conservation of natural resources.

It has unique and incomparable qualities which no ingenious human has yet managed to copy or improve. Cork is made of 40 millions cells per cm³ resembling a "honeycomb structure" which protects the tree from weather temperatures sharp changes. Each cell functions as a miniature natural thermal insulator and also provides above standard sound insulation and shock absorber properties.

Microscopic photo of cork

The exclusive natural qualities of cork make it ideal to use in flooring as it reduces sound, provides an optimal floor temperature throughout the year and is comfortable to walk on.

The essence of cork flooring

OPTIMAL FLOOR TEMPERATURE

The unique cork thermal insulation features provide an optimal floor temperature all year round, assuring a more warm and comfortable ambience with energy cost savings.

NATURAL NOISE ABSORBER

Cork's natural properties make it an excellent sound absorber. It reduces noise transmission between and within rooms, creating a quieter and peaceful environment in your home.

EASY TO WALK ON

The cork floor is very comfortable to use due to its natural and inherent flexibility. It is very pleasant to touch, even with bare feet, and stable enough to decrease fatigue, providing a unique comfort in movement.

A HEALTHY CHOICE

Cork's shock absorbing characteristics relieve strain on your feet, joints, legs and back and prevent injuries when falling. Besides that cork has also anti-bacterial qualities that make it an allergy friendly floor.

IMPACT RESISTANCE

Cork cells are also extremely crush-resistant. Cork has natural memory and will bounce back from hard impacts, retaining its elasticity. These properties combined with an extra wear resistance surface, create a very durable floor, preserving a perfect look for many years to come.

Corkcomfort

In modern interior design, the creation of spaces with style and personality starts with beautiful and expressive floors. Using and combining different shapes of natural Cork, our team of experts and trendsetters created a unique collection that opens a new approach in decoration, in harmony with nature and human emotions.

The style, charm and sophistication of these genuine natural designs, provides the creation of atmospheres full of authenticity and character.

Warm & Comfortable

Feel a warm and pleasant touch
under your bare feet

Sustainable & Conscious

The true sustainable flooring

Stylish & Cosy

A cosy living with the freshness of a modern decor

Amazing Designs
with the comfort of cork

More than just a beautiful floor!

Wicanders® cork floors have been developed over the years to provide the perfect match between beauty, comfort and the highest standards of durability.

This core cork layer, due to its slight resilient qualities, has the ability to bounce back from hard impacts, which makes it very robust and increases the life span of the flooring.

Combining traditional and modern features, **Corkcomfort** floors are made of a unique multilayer structure. The top finishing layer of wear protection prevents scratches and abrasions due to normal use. The different cork visuals are made with a layer of extremely thin sheets of veneer and, underneath, lays a core layer of pressed cork which provides stability, warmth and comfort under your feet.

With **Corkcomfort** floors there is no need to invest in extra underlay to improve sound and thermal properties. Natural cork cells are perfect sound absorbers and insulators.

Let Wicanders® introduce you the world of cork floors with a variety of product lines, each with its own functionality and options for living spaces.

Floating solution

With the glueless Corkloc® installation system, simply put the planks together and securely click them into place. It is a very quick, safe and clean solution. Available with 2 different protective finishing: WRT for residential areas or HPS for commercial areas.

- Protective finish (WRT or HPS)**○
Wear resistance
- Natural cork veneer**○
Decorative visual
- Agglomerate pressed cork**○
Comfort and thermal insulation
- HDF - high density fiberboard with Corkloc®**○
Quick & Safe installation
- Integrated insulating cork underlay**○
Sound insulation reinforcement

Glue down solution

The traditional glue down solution provides superior comfort and minimal step sound. Available with 4 different protective finishing: Unfinish or PU pre-finish (finish on-site) and with WRT for residential areas, or HPS for commercial areas (ready to use).

- Protective finish (Unfinish, PU Pre-Finish, WRT or HPS)**○
Wear resistance
- Natural cork veneer**○
Decorative visual
- Agglomerate pressed cork**○
Comfort and thermal insulation
- Vinyl backing layer (only in HPS solution)**○
Balancing layer

Fastconnect® solution

With its press-sensitive adhesive and the revolutionary Grip-Strip system, each tile tags to the other beside it, and not to the subfloor. It can be easily applied on top of almost any kind of surface, which makes it ideal for renovations. Available with PU-Finish for immediate use.

- Water based PU Varnish**○
Wear resistance
- Natural cork veneer**○
Decorative visual
- Agglomerate pressed cork**○
Comfort and thermal insulation
- Layer Grip-Strip**○
Fast & Easy installation

Identity

Why are Wicanders® cork floors the **perfect choice**?

Acoustical properties - **Sound reduction**

Wicanders® cork floors are exceptionally efficient to use whenever noise reduction is critical, or desired. Cork is an extremely efficient natural sound absorber, cutting noise within a room when someone walks on the floor (step sound) and even acting as a noise buffer between the floor and the rooms underneath (impact sound).

Corkcomfort Floating

Corkcomfort Glue down

Note: For detailed information by product line, please consult the technical data sheet on page 50.

Biomechanical Properties - **Physical comfort**

Impacts/ Shock Absorbing

Wicanders® cork floors are very comfortable to use due to cork natural and inherent flexibility. Softer than wood and harder than carpets, the perfect mix to reduce heel strike impacts, relieving leg and back stress, but stable enough to help the foot impulse, reducing the walking effort and decreasing fatigue.

Rigidity/ Fatigue

Thermal Properties - **Warmth**

The natural thermal insulation properties of cork make Wicanders® floors very energy efficient, providing a pleasant touch, even with bare feet, and an optimal floor temperature all year round which contributes to the overall comfort.

Thermal Comfort

Healthy

Cork floors come with surface finishes that put a stop to entrapped dirt, germs or fungus, thus actively contributing to a healthy and hygienic environment.

Impact resistant

Due to the unique cork structure and flexibility, cork floor surface has the ability to “bounce” back from impacts, making it more durable and resistant than hard surface floors, like wood or tiles.

Low & Easy Maintenance

The special surface finishes of Cork floors make them easier to clean and maintain.

Fast&Easy Installation

Cork floors with locking system Cork Loc 2G, Cork Loc&fold, Cork Loc 5G-C and the new *Fastconnect* system are easier and faster to install. Saves time and reduces installation expenses.

Sustainable

Cork comes from the bark of the cork oak tree. It is removed from the trunk by hand without ever damaging the tree. Every year a new bark grows making it a renewable and sustainable resource.

Think green choose Wicanders®

Wicanders® is a truly sustainable brand! Produced by Amorim, it represents a unique balance between the creation of wealth and the protection of the environment. The starting point is a raw material that is extracted cyclically from the cork oak trees without ever damaging them. This raw material is then transformed into high value-added products while promoting the economic and social sustainability of areas at risk of desertification.

Several eco-efficiency studies, based on a comparative analysis with several other types of flooring, illustrate the excellent environmental performance of Wicanders® products and its manufacturing process. Besides the smaller amounts of energy and raw materials required for the manufacturing process, these products actively contribute to reducing global warming, not only through their low emissions, but also due to cork's natural property of retaining CO₂.

It is estimated that the Portuguese cork oak forest – montado – is responsible for retaining 5% of the country's annual CO₂ emission, representing 4.8 million tons per year.

The importance of Cork Oak

The Cork Oak (*Quercus Suber L.*) is a tree belonging to the Oak family from which Cork is extracted. Its value is based not only on the products extracted from the tree, but on all of the agricultural, forest, pastoral and hunting activities that revolve around the cultivation of the Cork Oak.

Regular extraction of the Cork (a process called stripping) is a fundamental contribution for environmental, economic and social sustainability in the rural areas of the Mediterranean region where the Cork Oak may be found.

The Cork tree is a slow growing tree, which may live for 200 years, which allows it, on average, to be stripped 16 times during its lifetime. The first extraction of cork from the Cork Oak tree occurs only 25 years after planting, following which it is harvested in 9 year cycles, without ever damaging the tree in any way. This method allows the cork oak forest to fulfill its role of fixing CO₂, thus actively contributing to reduce global warming.

The Cork forest in Portugal (700.000 hectares), known as "Montado", is a typical Iberian Landscape which is key in supporting a natural bio-diversity, including some of the most endangered species in the world: Iberian Lynxes, Imperial Eagles', Black Storks, Wolves and Wild Bears.

Wicanders' solutions for a perfect floor!

FINISHINGS

HPS surface finish (High Performance Surface) has been specially developed for areas with heavy traffic, such as commercial, business or general public areas. This high performance surface has an extra hard wearing surface combined with Nano-Beads Technology, where extremely tiny beads are embedded in a top layer for improved properties such as scratch, slip, scuff and stain resistance.

Xtreme WRT surface finish (Wear Resistance Technology) is the right choice to fit the most demanding needs of domestic areas. This environmental friendly varnish is based on a ceramic compound which ensures exceptional strength and longevity.

For domestic areas that need a natural look and a soft touch, **PU** is the right solution. It is available pre-finish, to be completed on site, and finish for immediate use.

For those seeking for a customized solution, the **unfinish** option is what you are looking for. The surface is prepared to be finished on site, so you can select the finish that best suits your needs.

INSTALLATION SYSTEMS

CORKLOC®

CORK LOC® 2G

Välinge's 2G locking system is one of the most used and appreciated systems in the world. It is a strong and robust mechanical, glue-free, locking system installed by angling of both long and short side.

CORK LOC® FOLD DOWN

The Cork Loc Fold Down, designed to simplify the installation by a "single-action-movement", is fast and easy to install. One single maneuver and the floor board is installed. This innovative system is available for narrow planks in 1220x140mm.

CORK LOC® 5G-C

The 5G-C locking technology is the most advanced type of Fold Down system on the market. It is a single action installation system with angling on the long side and a flexible tongue to fold the short side. The installation with Corkloc 5G-C locking system is faster and easier than conventional locking systems, and it really clicks, giving you a confirming sound. It is available for tiles in 605x445mm.

GRIP-STRIP

PVC Strip
with press-sensitive glue

Cork Grip
with press-sensitive glue

FASTCONNECT®

Fastconnect presents the revolutionary Grip-Strip system. With its press-sensitive adhesive it offers a very versatile and simple way to install a new cork floor. Because each tile tags to the other beside it, and not to the subfloor, it can be easily applied on top of almost any kind of surface. It is ready for immediate use. It is available in tiles with 600x450mm.
